## Understanding the learning process

### learning styles

### Overview of Learning Styles

Many people recognize that each person prefers different learning styles and techniques.

Learning styles group common ways that people learn. Everyone has a mix of learning styles. Some people may find that they have a dominant style of learning, with far less use of the other styles. Others may find that they use different styles in different circumstances. There is no right mix. Nor are your styles fixed. You can develop ability in less dominant styles, as well as further develop styles.
