Water

Introduction

Water is one of the most important things in the universe. It is essential for life and is used in many different ways. It is used for drinking, washing, and many other things. It is also used for growing crops and for many other things. Water is a very important part of our lives and we should take care of it.

Sources of Water

Most of the water that we use comes from rain. Other sources are lakes, rivers, and oceans. There are also many other sources of water, such as glaciers and snow. Water is a very important part of our lives and we should take care of it.

How is Water Used

In cities, people get water from taps. Water from taps is used for many things, such as drinking, washing, and many other things. In the countryside, people get water from wells and rivers. Water is a very important part of our lives and we should take care of it.

How is Water Used

In cities, the water is taken from large water towers for houses. The water is cleaned at road and garden hoses. It is sent through pipes to homes by pipes. The water is used for drinking, washing and irrigation in fields.

It is also used for irrigation and some by digging wells in the mountains. The water is not stored in other quantities. It is rather from mountains. It is also used for irrigation.

The water is very salty and cannot be used in houses.

VISIT TO PINGALWARA

DATE: 11/07/2024

Pingalwara was founded in the early 1920s by Dr. S. S. Srinivasan, a physician by training and also a pioneer in the field of child health. It is headed by Dr. Srinivasan, a physician by training and also a pioneer in the field of child health.

Pingalwara is a charitable society under the act of 1942, it is headed by Dr. Srinivasan, a physician by training and also a pioneer in the field of child health.

Brief History About Pingalwara:-

Pingalwara also provides a free dispensary for a local bank, a canteen for the children and a free primary school in a village in the district of Mysore. The case of children seems to be a local problem in the district of Mysore.

Dr. Srinivasan has conducted the simple tests in the form of a free dispensary. The case of children seems to be a local problem in the district of Mysore.

VOCATIONAL CENTER

We also went to the vocational center where the selected students of Lingayana got training and knowledge about stitching, knitting, sewing etc. The girls are of great enthusiasm about vocational training to do some work by hands. So, they got asked to wear their handmade bag during that week. These fees students, also get prepared of making pens and beautiful and useful things from their scrap material. The material of these things are prepared by Pinalunas. They gave away material to make Army bag. They also from and gave material. Their are eight stitching machine which girls use. During some days, there were a shewasee activity where beautiful hand made scarf was and a dress made by impressed by their ability, resource of art.

CHILDREN

WIBED

We also visited the children's record school
 and saw many children around there. In fact
 many children suffer from not able to think
 when faced with from them. Some could
 not sit properly. We provided many extra help
 like chocolate, tea, fruit etc to them and
 during session of that department helped the chil-
 dren to sit that order.

OLD AGE HOME

Social work is not done for financial gain or
 fame. It is for self satisfaction. One
 should believe in life and should be lived for
 others not for really. Social work means give

It is rightly said cleanliness is next to godliness.
Cleanliness means keeping our body, mind and living
being secured in them. This is good habit. It should
be cultivated from early life. Cleanliness
refers to the habitual acts of keeping the cleanliness
environmental hygiene. In a simple words, it is the
state of being clean. Cleanliness
may be used with a moral quality and may be
regarded as contributing to other values.
such as, health and liberty. The concept of
cleanliness differs from purity which is
physical moral or ritual state of
human from pollutants.
